The Illawarra Shoalhaven Local Health District (ISLHD) Cardiovascular Clinical Trials Unit is situated at the Illawarra Heart Health Centre in Wollongong Hospital. It boasts a specialised team comprising doctors, nurses, and allied health professionals.

This unit actively supports a range of clinical trials, contributing to evidence-based practices, fostering knowledge development and enhancing patient care within the local community.

This month marks the beginning of an exciting new global study in the fight against cardiovascular disease

The ARTEMIS study

ARTEMIS study introduction video

ARTEMIS is a clinical study involving approximately 10,000 people from more than 20 countries worldwide and will last for about 25 months depending on when you join the study.

What is the purpose of ARTEMIS?

The ARTEMIS study is testing the anti-inflammatory study medicine, ziltivekimab to learn if it can reduce the risk of a future heart attack or stroke in people who have just experienced a heart attack.

REFERRAL OR CONSULTATION

To discuss your patient with an ISLHD Trials Clinician
please phone the Illawarra Heart Health Centre on 02 4253 4908

ISLHD Cardiovascular Clinical Trials

Medication trials

Heart Failure & Inflammation	ATHENA: Ziltivekimab (anti-inflammatory monoclonal antibody) versus placebo in patients with heart failure, mildly reduced ejection fraction HFmrEF, or preserved ejection fraction HFpEF. Evaluating functional capacity, heart failure symptoms and systemic inflammation. 4 x Monthly injection	A/Prof Lee	
Acute Myocardial Infarct	ARTEMIS: Ziltivekimab (anti-inflammatory monoclonal antibody) versus placebo on patients with acute myocardial infarct CV outcome study. Monthly injections	A/Prof Lee	

Intervention trials

Aortic stenosis	EASY-AS: A trial of early valve replacement in severe asymptomatic aortic stenosis	Dr Danson	
Hyperlipidaemia	GOAL ASIA: Guideline Oriented Approach to Lipid Lowering In Asia-Pacific	A/Prof Lee	
LV thrombus	RELEVANT: Resolution of left ventricular thrombus with different anti coagulation strategies	Dr Moragues	
Implant device	PROTECT ICD: Programmed Ventricular Stimulation to Risk Stratify for Early Cardioverter-Defibrillator (ICD) Implantation to Prevent Tachyarrhythmias following Acute Myocardial Infarction	A/Prof Lee	
Pacemakers	PARTICIPATE: Partnering remote monitoring of implanted cardiac devices with intelligent patient engagement	A/Prof Lee	

Observational trials

Heart Failure & Cardiovascular Disease	POSEISON: Observational study looking at prevalence of systemic inflammation in patients with Atherosclerotic Cardiovascular disease and Heart Failure	A/Prof Lee
