

ISLHD PET CARE PLAN

Pets are an important part of life for many people. Therefore, it is essential to plan for their care if you can no longer look after them or there is an emergency.

A pet care plan can be created to assist health providers, volunteers, family members, or friends in taking care of your animals when you are unable to do so. This might be necessary while you are in the hospital or after you pass away.

Having a pet care plan in place can provide reassurance that your pets will be well cared for according to your wishes.

Please complete a separate form for each pet
