

Obtaining Evidence of Vaccinations for Health Care Workers and Students

Evidence of Vaccinations

Evidence should be presented on the NSW Health *Vaccination for Health Care Workers and Students*, and **must** include as much of the following as possible:

- Name of vaccine
- Date given
- Batch No. (where possible)
- Name & Signature of Vaccine Provider
- Practice Stamp from where the vaccine was given

Evidence of Serology

- Original serology reports **must** be provided to ISLHD
- Exact transcription of results onto the Vaccination Card by an Authorised Vaccine Provider. Results must be recorded as numerical values or 'Positive/Negative' or Detected/Not Detected as appropriate
- Rubella will require the numerical result AND the pathologist's baseline figure used to determine immunity

Where to find records - sources of information

- [Vaccination Record Card for Health Workers and Students](#) – with personal details completed
- If existing NSW Health employee request immunisation report from local health district (LHD)
- [Baby Blue Book](#) (if born in Australia)
- Childhood vaccination records from birth country
- The [Australian Immunisation Register](#) for immunisation records after 1996 (Australian residents only)
- Your family General Practitioner (GP) may be a good source of vaccination records
