

Obtaining Evidence of Vaccinations for Health Care Workers and Students

Evidence of Vaccinations

Evidence should be presented on the NSW Health [Vaccination Record for Health Care Workers and Students](#) and **must** include the following:

- Name of vaccine
- Date given
- Batch No. or Brand Name (where possible)
- Official Certification by Vaccination Provider (clinic/practice stamp, full name and signature next to each entry)
- Copies of vaccination records (e.g. childhood vaccinations) and copies of relevant pathology reports may be attached to the card, if available.

Evidence of Serology

- Serological results should be recorded on the card as numerical values or positive/negative, as appropriate, not simply “immune”

Where to find records - sources of information

- [NSW Health Vaccination Record Card for Health Workers and Students](#) – with personal details completed
- For existing NSW Health employees request an immunisation report from local health district (LHD)
- [Baby Blue Book](#) (if born in Australia)
- Childhood vaccination records from birth country
- The [Australian Immunisation Register](#) for immunisation records after 1996 (Australian residents only)
- Your family General Practitioner (GP) may be a good source of vaccination records

Vaccination Record Card for Health Care Workers and Students			
Surname (please print)		Given names	
Address			
State:	P/Code:	Date of Birth:
